

SIEMENS

Roadblocks Removed.

Grow your network with the RUGGEDCOM RX1500/RX5000 multi-service platform.

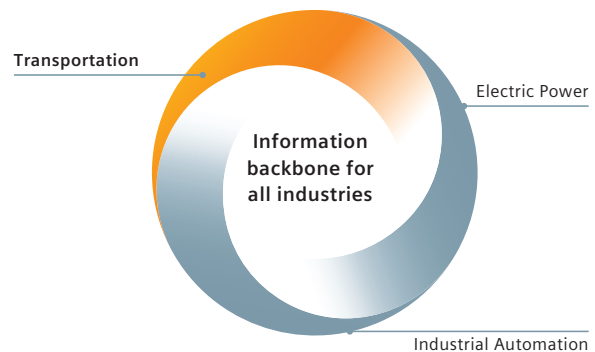

siemens.com/ruggedcom

The RUGGEDCOM RX1500 (shown) and RUGGEDCOM RX5000 multi-service platforms are ideal solutions to the challenges faced by the Intelligent Transportation Systems (ITS) community worldwide, such as the need to improve reliability, efficiency and safety.

The RUGGEDCOM RX1500/RX5000 are layer 2/layer 3 switches and routers with the in-service configuration flexibility and the diversity of WAN/LAN interfaces to support present and future ITS applications. These platforms carry a high MTBF and have been successfully deployed within the ITS industry worldwide.

Able to withstand the harshest environmental conditions, these Rugged Rated products provide a high level of immunity to electromagnetic interference (EMI), heavy electrical surges and can be placed in almost any location with their wide operating temperature range of -40 to +85°C.

Let us show you how our RX1500/RX5000 multi-service platform can remove roadblocks from your network development.

Answers for industry.
